

# SCENEdots Patent Pending

Where Hindsight and Innovation Meet

Finally a way to stripe diamond tread plate!  
[www.scenedots.com](http://www.scenedots.com)

Until now there was no way to apply safety striping to diamond tread plate, which covers the rear of most fire apparatus. **SCENEdots** allows not only the application of Chevron striping but allows departments to custom stripe their trucks including truck identifiers.

With six colors available **SCENEdots** design possibilities are endless and the safety benefits are priceless.

"We immediately saw the benefits of **SCENEdots** and chose to apply them to all our trucks."

Chief, Herberer  
Braidwood Fire Dept. - Illinois

"The **SCENEdots** are on one of our ladder companies and the second will soon be installed. We love them."

Chief, Bucy  
Portage Fire Dept. - Indiana

**A REAR THAT WANTS TO BE SEEN**
